

10.2.D2 • Parallelograms

Use the properties of parallelograms to set up and solve equations to find the value of the variables.

Use the properties of parallelograms to set up and solve a system of equations to find the value of the variables.

9. Given: $\square WSTV$
 $WS = x + 5$
 $WV = x + 9$
 $VT = 2x + 1$

Find the value of x AND the perimeter of $WSTV$.

10. Given: $\square ABCD$
 $\angle A = x$
 $\angle D = 3x - 4$
 Find: $m\angle D$ & $m\angle C$

11. $ABCD$ is a parallelogram with perimeter 52. The perimeter of $ABNM$ is 36, and $\overline{NC} \cong \overline{AM}$. Find NM .

12. Given: Parallelogram $FGHJ$
 $FG = x + 5$
 $GH = 2x + 3$
 $\angle G = 40^\circ$
 $\angle J = 4x + 12$
 Find: The value of x , $m\angle F$, AND the perimeter of $FGHJ$

13. Use the given information to set up and solve a system of equations.
 Find the value of the variables. Then find the measure of all four angles.

- Given: $\angle A = x + 3y$
 $\angle B = x - 4$
 $\angle C = 4y - 8$
